Note: 1) Figures may not add due to rounding

2) The estimated resident population of an area includes all people who usually live there, whatever their nationality. People arriving into an area from outside the UK are only included in the population estimates if their total stay in the UK is 12 months or more. Visitors and short term migrants (those who enter the UK for 3 to 12 months for certain purposes) are not included. Similarly, people who leave the UK are only excluded from the population estimates if they remain outside the UK for 12 months or more. This is consistent with the United Nations recommended definition of an international long-term migrant. Members of UK and non-UK armed forces stationed in the UK are included in the population and UK forces stationed outside the UK are excluded. Students are taken to be resident at their term time address.

Table: Component of change

England	16.1	8.9	23.2	27.2	23.7	17.5	8.2

Note: Rate for LAs are based on mid-2014 population estimates. Age standardised rates are calculated using 2013 ESP Rates for all ages, under 16, under 18 and 35 and over are based on populations 15-44, 13-15, 15-17 and 35-44 respectively Source: Office of National Statistics, 2018

Claimant Count

Table: Claimant Statistics for Kingston, March 2018

Area	Claimant count	Claimants as a proportion of residents aged 16-64
Alexandra	65	1.1
Berrylands	90	1.4
Beverley	95	1.4
Canbury	115	1.1
Chessington North and Hc	70	1.2
Chessington South	75	1.1
Coombe Hill	70	0.9
Coombe Vale	50	0.7
Grove	110	1.2
Norbiton	150	1.9
Old Malden	55	0.9
St James	60	1.1
St Mark's	115	1.0
Surbiton Hill	70	0.9
Tolworth and Hook Rise	80	1.2
Tudor	50	0.9
Kingston upon Thames	1,320	1.1

Note:
Claimant count: The number of people claiming Jobseeker's Allowance plus those who claim Universal Credit who are out of work.

Residence-based proportions:

This is the official measure below national/regional level. It is available for local authorities, constituencies, travel to work areas, regions and countries and it expresses the number of claimants as a percentage of the population aged 16-64, sourced from the mid-year population estimates.

Under Universal Credit a broader span of claimants are required to look for work than under Jobseeker's Allowance. As Universal Credit Full Service is rolled out in particular areas, the number of people recorded as being on the Claimant Count is therefore likely to rise.

At national/regional level the official measure is the workplace-based rate, but use this measure when comparing national/regional areas with smaller areas (e.g. local authorities) to ensure you are comparing like with like.

All data are rounded to the nearest 5 and may not precisely add to the sum of the number of people claiming JSA, published on Nomis, and the number of people claiming Universal Credit required to seek work, published by DWP, due to independent rounding.

Rates for local authorities from 2016 onwards are calculated using the mid-2016 resident population aged 16-64.

Rates for 2017 electoral wards are calculated using the mid-2016 resident population aged 16-64.
